

Product Information

Product Name **Techmide 191 LS**

Product Description DEA amide of a Linoleis/Soy Fatty Acid Blend.

General Information Techmide 191 LS is a 1:1 Linoleamide DEA and Soyamide DEA in a 1:1 ratio.

Typical Uses Techmide 191 LS is typically used as a foam booster and foam stabilizer in many industrial and personal care applications. Techmide 191 LS can also be used as a viscosifier in many applications.

		Specifications
Physical Properties	pH (1% Solution)	9.0 – 10.5
	Color (G)	6.0 max.
	% Free Amine, as DEA	7.0 max.
	% Free Fatty Acid	1.0 max.
	Specific Gravity (@ 25 deg C)	0.98

Storage and Handling Techmide 191 LS is not believed to be a hazardous material under the current Department of Labor definitions. However, as with most surfactants, it is recommended that normal safety precautions be employed when handling Techmide 191 LS.
