

Product Information

Product Name **Techmide 2:1 ODEA**

Product Description DEA amide of Oleic Acid.

General Information Techmide ODEA is a 2:1 Oleic Diethanolamide.

Typical Uses Techmide ODEA is typically used as an efficient thickener and foam stabilizer in soaps, powdered detergents, industrial and personal care applications.

		Typical Values
Physical Properties	pH (1% Solution)	9.0 – 10.0
	Color (G)	8.0 max.
	% Free Amine, as DEA	22 – 25
	% Free Fatty Acid, as Oleic	4 – 7

Storage and Handling Techmide ODEA is not believed to be a hazardous material under the current Department of Labor definitions. However, as with most surfactants, it is recommended that normal safety precautions be employed when handling Techmide ODEA.
